## **DETAILED ACTION**

1. Claims 1-24 are pending.

### ***Claim Objections***

2. Claims 3, 8, and 13 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim.

Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The cited claims provide limitations directed to the decrypting of encrypted private data; however, their parent claims already provide limitations directed towards this feature.

3. Claim 1 is objected to because of the following informalities: Claim 1 contains the typo "shares to crate a master key." Examiner has interpreted the limitation to read "shares to create a master key." Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claims 1, 3, 6 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2134

6. Claim 3 recites the limitation "the validated master key" in line 3. There is insufficient antecedent basis for this limitation in the claim.

7. Claims 1 and 6 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The cited claims provide the limitation "unblind and combine the blinded key shares." The cited limitation is unclear and indefinite because Examiner cannot determine the source of the blinded key shares the limitation refers to. It appears that the blinded key shares are unblinded and then the blinded key shares are used to create a master key. It is unclear to the Examiner how blinded key shares may be used to create the master key when the shares have previously been unblended.

***Allowable Subject Matter***

8. Claims 11-15 and 22-24 are allowed.

9. Claims 2-5, 7-10, 16-18, and 19-21 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

10. The following is a statement of reasons for the indication of allowable subject matter: The cited prior art fails to specifically teach or suggest a client executing

Art Unit: 2134

instructions for unblinding a group of blinding key shares to form a master key to be used to decrypt encrypted data.

### ***Conclusion***

11. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
